

SKILLS FOR LIFE LEARNERS

The ethos of our school is to equip our children with the skills they need to navigate the world around them as they grow up. Technology is at the heart of our society now and it is essential that children leave school being able to navigate the technical world safely and confidently. Our computing curriculum promotes questioning, problem solving and analytical thought. These skills also feature heavily in other areas of the curriculum but their importance in computing is paramount. If children have these skills they can become good online citizens which will mean they can navigate the dangers and pitfalls of the internet and technology whilst gaining all the benefits to improve their lives and experiences.
